

James O'Brien

Fullstack Web Developer

jamesfromonline@gmail.com - jame5.co - github.com/jamesfromonline

Summary

Fullstack web developer that works with technologies such as ReactJS, NextJS, Node, GraphQL, and CSS3/SCSS. Inspired by unique and creative UI designs and implementations. Looking for opportunities to better my skills as a developer and team mate at every turn.

Experience

Self Employed | Fullstack Developer | April 2016 - Current

- Translated mockups into functioning code using ReactJS, NextJS, Node, and CSS/SCSS.
- Successfully maintained multiple clients' web platforms and CMS systems.
- Built out custom client automation tools using vanilla JavaScript, jQuery, Node, and CSS.
- Utilized agile-focused tools such as Asana, Trello, and TeamWork to manage tasks and time.

Nrdstr | Fullstack Developer/Co-Founder | March 2020 - January 2021

- Successfully designed and built client websites utilizing React, Gatsby, and CSS/SCSS.
- Maintained existing client websites that use platforms such as Wordpress and Shopify.
- Created production environments for web apps using services such as Netlify, Digital Ocean, AWS, and Heroku.

Gooee | Frontend Developer | June 2017 - January 2018

- Worked closely with UI Designer to translate Invision mockups into high quality code.
- Created responsive, well structured stylesheets using CSS3 and Stylus.
- Successfully redesigned and built the firmware UI for company hardware using CSS and JavaScript.

Education

The Iron Yard | JavaScript Engineering | Graduated June 2017
